

9  
White. 1614.

A new Almanacke and  
Prognostication, for the  
yeare of our Lord  
God: 1614.

Being the second from Leape-yeare.

Composed for the Direction of the  
most famous Citty of London,  
and will serue generally for  
the Monarchy of great  
Brittaine.

By Iohn White wellwiler to the  
Mathematickes.

Imprinted at London for the com-  
panie of Stationers.

## Phisicall Elections.

Take	{	Comits,	{	the moone in,	{	8.m.vv.
		Glitters,				v.ii.iii.
		Sargarines,				5.v.
		Preparatiues,				ii.ii.iii.
		Stoprewmes & fluxes,				8.m.vv.
		Purge by needling,				5.ii.iii.

Let blood the sanguine, from the new moone to the first quarter.

The choericke, from the first quarter to the full.

The flegmaticke from the new moone to the last quarter.

The malancholicks from the last quarter to the new moone.

## Dangerous times for blood letting.

It is dangerous to let blood in the heate of Sommer, or  
cold of winter, and when the moone is in the signe which  
gouerneth that part of the body you would let blood: like-  
wise within two dayes of the change of full moone.

The beginning and ending of the Tearmes with their  
returnes, this present yeare 1614.

**Hillary Terme.** beginneth on the 24. of January and en-  
deth on the 12. of February, and hath fower returnes.

{ Octabis Hillary. }	{ Craft. purifica }
{ Quind. Hillary }	{ Octabis purifica }

**Easter Terme.** beginneth on the 11. of May, and endeth  
on the 7. of June, and hath 5. returnes.

{ Quind. Pasche }	{ Mens. Pasche }	{ Quinque pasche }
{ Tres. Pasche. }		{ Craftin. assention. }

**Trinitie Terme.** beginneth on the 24. of June, and endeth  
on the 12. of July, and hath fower returnes.

{ Craft Trinitatis. }	{ Quind. Trinitatis. }
{ Octab. Trinitatis }	{ Tres. Trinitatis. }

**Michaelmas Terme.** beginneth on the 10. day of October  
and endeth on the 28. of November, and hath eight  
returnes.

{ Octabis Michael. }	{ Craft. Animarum. }
{ Quind. Michael. }	{ Craft. Martini. }
{ Tres. Michael. }	{ Octab. Martini. }
{ Mense Michael. }	{ Quind. Martini. }

Note that the Exchequer openeth eight dayes before any  
Terme beginneth, except Trinitie Terme, and then it  
openeth but fower daies before.

## Phisicall Elections.

Take	{	Comits,	{	the moone in,	{	8.m.vp.
		Slifters,				v.~.~.
		Gargarismes,				5.v.
		Preparatiues,				II.~.~.
		Stop rewmes & fluxes,				8.m.vp.
		Purge by netling,				5.n.m.

Let blood the sanguine, from the new moone to the first quarter.

The choiericke, from the first quarter to the full.

The flegmaricke from the new moone to the last quarter.

The malancholicks from the last quarter to the new moone.

## Dangerous times for blood letting.

It is dangerous to let blood in the heats of Summer, or cold of winter, and when the moone is in the signe which governeth that part of the body you would let blood: likewise within two dayes of the change of full moone.

The beginning and ending of the Tearmes with their returnes, this present yeare 1614.

**Hillary Tearme.** beginneth on the 24. of January and endeth on the 12. of February, and hath fower returnes.

{ Octabis Hillary. }	{ Craft. purifica }
{ Quind. Hillary }	{ Octabis purifica }

**Easter Tearme.** beginneth on the 11. of May, and endeth on the 7. of June, and hath 5. returnes.

{ Quind. Pasche. }	{ Mens. Pasche. }	{ Quinque pasche }
{ Tres. Pasche. }		{ Craftin, assention. }

**Trinitie Tearme.** beginneth on the 24 of Iune, and endeth on the 12. of July, and hath fower returnes.

{ Craft Trinitatis. }	{ Quind. Trinitatis. }
{ Octab. Trinitatis }	{ Tres. Trinitatis. }

**Michaelmas Tearme.** beginneth on the 10. day of October, and endeth on the 28. of November, and hath eight returnes.

{ Octabis Michael. }	{ Craft. Animarum. }
{ Quind. Michael. }	{ Craft. Martini. }
{ Tres. Michael. }	{ Octab. Martini. }
{ Mense Michael. }	{ Quind. Martini. }

Note that the Exchequer openeth eight dayes before any Tearme beginneth, except Trinitie Tearme, and then it openeth but fower daies before.

The Anathomie of mans bodie, as the  
parts thereof, are gouerned by the moones  
passage through the twelue Signes  
of the Zodiack.

Taurus,  
Throat.  
Cancer,  
Brest, &  
middle of  
lungs.  
Virgo,  
Guts &  
belly.  
Scorpio,  
secrets &  
bladder.

Capricorn  
knees.

Aries, head.

Pisces, feet.

Gemini,  
Arms &  
hands.  
Leo,  
heart, &  
back.  
Libra,  
Reins  
& loines.  
Sagittari,  
thighs &  
hanches.

Aquaries  
Legs.

The fiery Ram, doth rule the head and face,  
In necke, and throat, the Bull doth challenge place:  
The aerie Twins, doe rule both armes and hands,  
The brest, and stomach, Cancer he commands:  
The ludy Lyon, hath the backe, and heart,  
bowels, and belly, is the Virgins part:  
A loynes, and Raynes, is Libras libertie:  
The Scorpion rules the stones, and privities.  
The Thiebes, and hanches, doth the Archer claime,  
And Capricorne, oft puts the knees to paine.  
Aquaries, makes the Legges, much aches ferle;  
And Pisces, rules the Anckles, feete, and heele.

Januarie hath xxxi. dayes.

Warne meates, and cloathes this month are good,  
take heede of bathes, and letting bloud.

1 day, sun riseth at 8 and 4 min setteth at 3 and 56 minutes,  
16 day, sun riseth at 7 & 40 min and setteth at 4 & 20 min.

White. 1614.

A Prognostication, for  
this yeere of our Lord God.

1 6 1 4.

Being the second from Leape yeare.

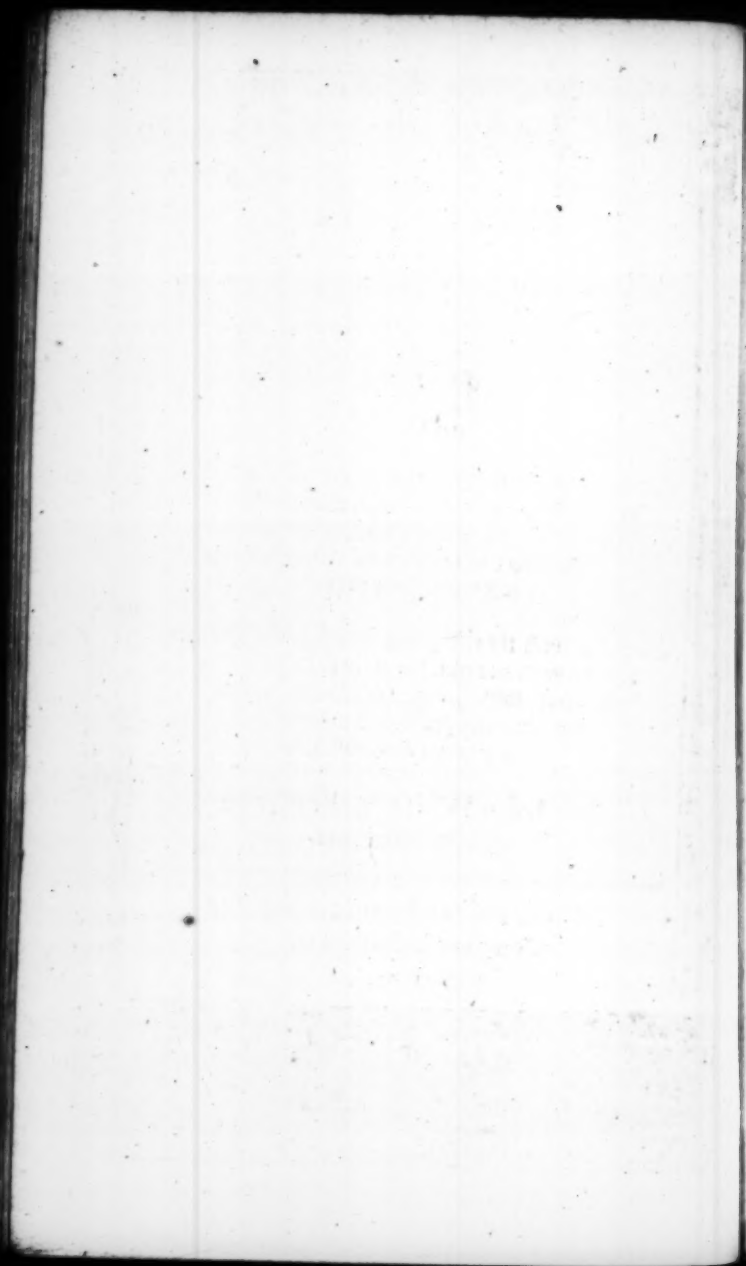

Wherein is conteyned the estate of the whole  
Yeare, the disposition of each Quarter, and  
the inclination of the weather for every  
Quarter of the Yeare through-  
out the whole yeere.

Together with the rising and setting of the Planets,  
and the good and euill dayes for each Moneth of  
the yeere: with Husbandry aduertisements,  
and other thinges fite to be knowne,  
both pleasant and profitable.

By Iohn White, welwiller to  
the Mathematickes.

Imprinted at London for the  
Company of Stationers.

1 6 1 4.

# A Declaration of the Disposition of the foure quarters of this yeare. 1614.

---

And first of Winter.

☉. in ♊. ☿. ♋. that is, the *Sunne* in  
*Capricorne, Aquarius, Pisces.*

This Winter Quarter taketh his beginning when the *Sunne* entrencheth into *Capricorne*, (which is on the twelfth of December,) and lasteth while the *Sunne* passeth through the three winterly Signes, *Capricorne, Aquarius, and Pisces*; which Quarter endeth on the 1. of *March*.

The quality of this Quarter, is cold, and moisture: Floodes soon arise, and Windes are sharpe: the Earth is congealed with Frost and Ice: all living Creatures are more feeble then in any other Quarter: and those things which the warme and comfortable Summer bringeth forth and nourisheth, Winter with his frozen and cold continuance destroyeth: it is requisite that we use such Meates as are warme and dry: The outward partes of our Bodies are not weakened by the coldnesse of the ayre, and naturall heate is driven into the inward partes of the body, and man is now warmest within, though coldest without.

The Diseases like to afflict our mortall bodies this Quarter, are Rheumes, Coughs, Halses, Hoars, payne in the eyes, red spots, Sores, Crampes, Falling sicknesse, and such like.

## A Prognostication.

Of the Second part of the yeare,  
called the Spring.

☉. in γ. δ. ιι. that is, the *Sunne* in  
*Aries, Taurus, Gemini.*

**T**he Spring being the most pleasantest Quarter in the yeare, and is naturally disposed to heate and moisture, taketh his beginning when the Sunne entereth into the first Signe Aries, (which is on the tenth day of March) and continueth whilst the Sun maketh his revolution through these three beemall Signes Aries, Taurus, and Gemini; which Quarter endeth on the xiii of June.

This Quarter is a very temperate Quarter, being a very moderate time, not so hot as Summer, nor so cold as Winter, nor so mutable as Harvest; it is the healthiest time in the yeare to keepe the body in health, and it driveth away Diseases gotten before. All living Creatures recover their former lost strength, the pores of the Earth are now opened, Birds and Beastes doe couple: and now the dayes and nights are of an equall length. Now it is fit to abate somewhat in feeding, and drinke somewhat the more. It is a good time for Blood-letting, Purging, Bathing, and Sweating.

The Diseases like to afflict vs this Quarter, are Smal-poxe, Measles, Ring-cull, Headach, Scabbes, Joynt-aches, Stranguries, Leprosies, and the like.

Of

White. 1614.

Of the third part of the yeare,  
called the Sommer.

☉. in ♋. ♌. ♍. that is, the *Sunne* in  
*Cancer, Leo, Virgo.*

**T**HE Sommer Quarter taketh his beginning when the  
Sunne entereth into Cancer, which is on the xiiij. day of  
June; and lasteth while the Sunne maketh his revolution  
through these three celestiall Signes Cancer, Leo, Virgo.  
This Quarter endeth on the xiiij. day of September.

This Quarter (according to Natures disposition) is hot and  
dry: Now Heate is at the highest, Windes lowest, Seas most  
quietest, Flowers and Fruites most pleasantest, and the painefull  
Bees gathereth their Honey: Now Serpentes are creeping abroad,  
and all living Creatures seemeth most ioyfull and merry. Now  
naturall Heate is dispersed through all the outward partes of the  
body, for man is not so hot within as in Winter, his digestion is  
more slow and weake. Now a man may drinke more largely, so it  
be small and coole; but eat the lesser quantitie: for now the Dog-  
dayes increasing, threatens to afflict vs with most dangerous  
Diseases.

As namely, the Pestilence, Frensie, inflammations of the Eyes,  
Calenturades, Jaundies, & askes, payne in the Eares, Ulcerations  
of the Mouth, and the like diseases.

## A Prognostication.

Of the fourth part of the yeare, called  
Autumne, or Haruest,

☉. in ♌. ♍. ♎. that is, the Sunne in  
*Libra, Scorpio, Sagittarie.*

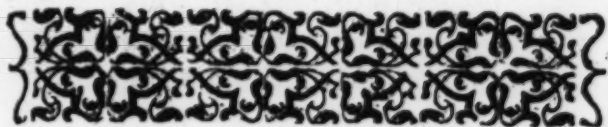

**A**UTUMNE, or Haruest (commonly called, the Fall of the  
Leafe) taketh his beginning when the Sunne entrencheth into  
Libra, which is on the xiii. day of September: and lasteth  
while the Sunne maketh his profession through the three  
Celestiall signes Libra, Scorpio, and Sagittarie: Which  
Quarter endeth on the xii. day of December.

The qualitie of this Quarter is by nature, cold and dry, melancholicke, like old Age, contrary to the Spring. Now Floodes are at the highest, Fountaines and Springs at the lowest: and the face of the Earth now loseth her beaute, Corne is reaped, and the Leanes doe fall: Beastes betake them to their Denes, and Serpentes to their Caves, for now the Ayre becometh to waite cold. This Quarter is more subject to sickness and diseases then any other Quarter.

This Diseases wherunto our Bodies are subject this Quarter, are Consumptions, Fluxes of blood, the Stone, Quartains Agues, Fistuloes, Sciatica. Tympanies, retention of brine, paine of the backe, Darkenisse of sight, melancholy passions, Spleene, and the Emreds: from which, let vs pray to the heauenly Creator, to deliuer and keepe vs.

Of

White. 1614.

Of the Eclipses happening this  
present yeere. 1614.

FTwer times this present yeere will the two bright Lampes of  
Heaven eclipse and hide the beauty of their faces from the  
earths, Inhabiters; whereof there will be seene but one of  
the Sunne, and two of the Moone, by vs heere in England.

The Eclipse of the Sunne will appeare to vs on the Twentry  
thred day of September, at one of the clocke after noone: and con-  
tinueth eclipsed two howers and ten minutes.

The first Eclipse of the Moone happeneth on the xv. day of  
March, at vii. of the clocke and 51. minutes at night. The durati-  
on of which Eclipse, lasteth two howers and fourtie sixe minutes.

The second Eclipse of the Moone happeneth on the vii. day of  
October, at liii. of the clocke and 26. minutes at night: And this  
Eclipse continueth two howers and twentie sixe minutes.

The

B 4.

## A Prognostication.

The rising and setting of the Planets, with  
the disposition of the Weather for euery  
Quarter of the Moone: together with  
the good and euill dayes, throughout  
the whole yeare.

### Of Ianuarie.

Saturne and Venus are neere together Southeast at Sun rise.  
Iupiter is South at Sunne set.  
Mars is in the East at Sunne set.  
Mercurie is vnder the Sunne beames.

**F**irst Quarter on Friday the vii. day, halfe an hower after vi. of  
the clocke at night. This Quarter is like to proue fayre.

Full Moone on Saturday the xv. day, halfe an hower after  
vi. of the clocke at night: frosty, and fayre.

Last Quarter on Saturday the xxii. day, a quarter of an hower  
past vi. of the clocke at night: wetter weather.

New Moone on Saturday the xxix. day, about vii. of the clocke  
at night: windy and wette.

The } Good dayes. ii. iiii. v. vi. vii. viii. x. xi. xii. xiii. xiiii. xv.  
} Euill dayes. vi. viii. x. xii. xiii. xiv. xv.

### Of Februarie.

Saturne is in the East at Sunne rising.

Iupiter is neere the South at Sunne set.

Mars & Mercury are neere together in the West at Sun set.

Venus shineth very bright Southwest at Sunne rising.

**F**irst Quarter on Sunday the vi. day, a quarter of an hower  
after v. of the clocke at night: frost & snow.

Full Moone on Monday the xiii. day, at ix. of the clocke in the  
morning: fayre dayes.

Last

## White. 1614.

**With** Last Quarter on Monday the xxi. day, three quarters of an hower  
 after two of the clocke in the morning: reasonable fairs.

 hower after two of the clocke in the morning. hot dayes.  
**The** Good dayes. iiii. vii. ix. xiiii. xvi. xx. xxii. xxiii. xxv. xxvii. }  
 Cuill dayes. v. viii. xii. xv. xix. xxi. }

---

## Of Aprill.

Saturne is in the West after Summe set.  
 Iupiter riseth in the East a litle after Summe set.  
 Mars is Southwest at Summe set.  
 Venus and Mercury rise neere together in the East a litle be-  
 fore the Summe.  
**First** Quarter on Thursday the vii. day, a litle after vii. of the  
 clocke in the morning: sweete showres,

Full

## A Prognostication.

**F**ull Moone on Thursday the xlii. day, three quarters of an hower after iiii. of the clocke in the morning: windy and wet.

**L**ast Quarter on Wednesday the xx. day, halfe an hower after viii. of the clocke at night: windes and showres.

**N**ew Moone on Thursday the xxviii. day, halfe an hower after vi. of the clocke at night: cold raine showres.

The } Good dayes. i. iiii. viii. ix. xii. xiv. xvi. xviii. xxiii. xxviii. xxx.  
 } Cuill dayes. v. p. xi. xii. l. xvii.

## Of May.

Saturne and Mars are neere together in the West at Sunset.

Jupiter is Southwest at Sunne rising.

Venus setteth a litle after the Sunne.

Mercury setteth with (his Sister) the Sunne.

**F**irst Quarter on Fryday the vi. day, merre vii. of the clocke at night: hot dayes.

**F**ull Moone on Fryday the xlii. day, halfe an hower after x. of the clocke in the forenoone: springing showres.

**L**ast Quarter on Fryday the xx. day, three quarters of an hower after viii. of the clocke in the morning: windy and wet.

**N**ew Moone on Saturday the xxviii. day, a quarter of an hower past x. of the clocke in the morning: lusty windes.

The } Good dayes. iiii. v. vii. viii. s. xvii. xviii. xxi. xxiii. xxvii.  
 } Cuill dayes. ii. ix. xii. xv. xvi. xviii. xxx. xxxi.

## Of Iune.

Saturne is a litle past the South at Sunset.

Jupiter is a litle past the South at Sunne rising.

Mars and Venus are Southwest at Sunset.

Mercurie setteth a litle after the Sunne.

**F**irst Quarter on Sunday the v. day, at vi. of the clocke in the morning: a very temperate season.

**F**ull Moone on Saturday the xi. day, a litle after vii. of the clocke

## White. 1614.

In the evening: soutry hot dayes.

Last Quarter on Saturday the xviii. day, at x. of the clocke at night: fayre and hot weather.

New Moone on Monday the xvii. day, at one of the clocke in the morning: some fall of moisture.

The } Good dayes. i. ii. iii. r. rv. xvii. xxi. xxii. xxiii. xxvii. }  
 } Full dayes. vi. vii. xi. xii. xvi. }

## Of July.

Saturne is full South at Sunset.

Iupiter is neere the South at Sunset.

Mars and Venus are Southwest at Sunset.

Mercury setteth with the Sunne.

First Quarter on Monday the iiii. day, three quarters of an hower after xi. of the clocke at noone: high windes.

Full Moone on Monday the xi. day, halfe an hower after iii. of the clocke in the morning: cleere skies.

Last Quarter on Monday the xviii. day, neere one of the clocke in the after noone: very hot weather.

New Moone on Tuesday the xxvi. day, a quarter of an hower after one of the clocke in the after noone: ripening dayes.

{ Good dayes. i. ii. vii. xi. xii. xv. xvi. xv. xxi. xxii. xxvi. xxvii. xxviii. }  
 { Full dayes. iii. vi. ix. xiii. xiiii. xviii. xix. }

The } Good dayes. vii. ix. xi. xiii. xv. xix. xxiii. xxv. xxix.  
 } Evil dayes. i. vi. viii. x. xii. xiv. xvi. xviii.

## How to iudge what weather will follow by the rising and setting of the Sunne.

**T**he Sunne rising bright and cleare signifieth a pleasant day. If he rise fiery redde, it promisseth raine : If in his rising be thinly overcast with a cloude, it betokeneth fowle weather : If the Sunne drive the cloudes before him into the west, it signifieth fayre weather : If at his rising there appeare a circle about him, and vanisheth away equally, it betokeneth fayre weather : Also, if he setteth redde, it signifieth fayre weather : If at his setting, he be divers coloures, or cloudes like water, it threatneth raine. If at the rising of the Sunne, his beames seme redde, or long, or incompleded with redde cloudes, it signifieth great windes : If at his setting there appeare a thicke mist, or if it raineth in the evening, it threatneth very fowle weather to follow. Also, if the Sunne beames be spotted either greene, pale, or blacke, gathered to a cloude, it signifieth raine. The Sunne setting cleere without any cloude, signifieth a fayre night to ensue : If the circle, or circles about the Sunne, be cleare and of no continuance, looke for fayre weather : If there be many circles, it signifieth winde : the redder they are, the more vehement windes : If the circles are heere and there broken, and are thicke and blacke, looke for cold, wind, or snow : Or, if he sette behind a great blacke cloude, raine followeth.

How

How weather is foreknowne by the Moone.

If the Moone in the third day of her change, or thre dayes before her full, or in the middell of the quarter, be found of pure light, nothing compassing her, the ends direct vj. the promised fayre weather: But bent to red colour, promoketh windes. The Moone pale, or somewhat blacke, or thicke, threatneth raime. When the Moone is five dayes old, marke the tips of her hornes, if they be blunt, it signifieth raime: if sharpe poynted and picking upwards, great windes. If in the fourth day after her change, she haue a red disk about her, it signifieth windes and raime.

Of the Iudgement of the Weather  
by the Starres.

If the Starres appeare of much light, and seeme to be of more bignesse and blasing then ordinary, it betokeneth great windes and moysture, in that part where they seeme so: and in Winter, great frostes. When dimme Starres appeare with long fiery rayles, it threatneth windes, and great drought: the more in number, the greater will be the effect. Also, when Starres seeme to shoothe or fall, it signifieth great windes in that place: If they seeme to shoothe in diuers places, it signifieth diuers windes: If in all places, windes, thunder, lightnings, and most tempestuous weather.

Briefe

## A Prognostication.

### Briefe Notes for the Elections of Husbandry.

**B**Efore you begin to Plant or Graffe, looke where the Moon  
stands ; if it be in the East or North, doe not meddle therewith.  
Plant or Graffe the Moone (or signe) in Taurus or Aquarius, in  
the increase of the Moone.

Trees grafted in Februarie, their fruit breedeth no Wormes.  
Remoue, and set young Trees, in September, October, Novem-  
ber, and Februarie, in the increase of the Moone, the being in  
Taurus, Virgo, or Capricorne.

Also, make at the taking vp of your Plant, which side grew next  
to the South, and set it so againe.

Cut not off the tops of Trees, if you would haue them for Tim-  
ber : but if you would haue them for Past, then lop off the tops  
of them.

Cut or prune Trees in March and Aprill, the Moone being in  
Taurus, Virgo, or Capricorne.

Cut Alders in Februarie, March, or September, the Moone in-  
creasing, being in Aries, Libra, or Scorpio.

The best time to fell all manner of Timber trees for building, and  
to haue them sound, is in December and Ianuarie, from the full  
to the change, the Moone being in Aquarius, and Pisces.

Fell Oake Timber trees for Barke, from the first of Aprill, to the  
last of Iune.

Gather Fruits about the full of the Moone, the Moon be not least  
in the East, in a faire and dry day, when the Dew is off them.

Plash Hedges, and fell Coppice for Fuel, in the first Quarter, in  
Aries, or Libra.

Cut Haire, and sheare Sheepe, to make it grow the longer and  
thicker, in the increase of the Moone.

Libbe or Geld Cattle, the Moone increasing, the being in Aries, Sa-  
gitarius, or Capricorne.

Kill Swine for Bacon, about the full of the Moone.

Purke your Land, that the Weedes may not grow thereby, in the  
decrease of the Moone, in Taurus, Leo, Scorpio, or Aquarius.

A short

A short Instruction, and very necessarie  
to know the times and seasons when  
to Sow and replant all manner of  
Seedes for the Garden.

- Sow Cabbages in Februarie, March, or Aprill, in the wane  
of the Moone: and replant them in the Decrease.
- Sow Cabbage-Lettuce in Februarie, March, or Iuly, in the old  
of the Moone.
- Sow Onions and Leekes, in Februarie or March, at the wane of  
the Moone.
- Sow Beets in February, or March, at a full Moone.
- Sow Coleworts white & green, in the middle of August or Sep-  
tember: Plant the young ones in October, and set them againe  
in September.
- Sow Parsneps in February, Aprill, or Iune, in a faire day.
- Sow Radish in February, Aprill, or Iune, in the increase of the  
Moone.
- Sow Pumpeons, Cucumberes, Melons, and Gourds, in Fe-  
bruary, March, or Iune, in a hot and faire day.
- Sow Spinage in February, or March in the old of the Moone.
- Sow Parsely, Fennell, and Aniseede, in February or March at  
the full of the Moone.
- Sow White Cicory in February, March, Iuly, or August, in a  
full Moone.
- Sow Cardus-benedictus, in February, March, or May, when  
the Moone is old.
- Sow Basil in March, in an old Moone.
- Sow Purselaine in February, or March, in the increase of the  
Moone.
- Sow Margeram, Violets, Time, Flower-gentle, Rosemary,  
and Lauander, in February, March, or Aprill, in the increase  
of the Moone.
- Sow Garden-creeses, and Rocket, in February, at the increase of  
the

## A Prognostication.

the Moone.

Sow Sauell in Februarie or March, at a new Moone.

Sow Saffron in March, when the Moone is old.

Sow Coriander, and Borage, in Februarie or March, in the increase of the Moone.

Sow Hartes-boync, & Samphire, in Februarie, March or Aprill in the old of the Moone.

Sow Gilliflowers, Hartes-ease, and Wallflowers, in March or Aprill, in an old Moone.

Sow Cardons, and Artichokes, in Aprill or March, when the Moone is old.

Sow Chickweed, in Februarie or March, at y<sup>e</sup> full of the Moone.

Sow Burnet in Februarie or March, when the Moone is old.

Sow Hyssope and Sauery in March, when the Moone is old.

Sow double Marygolds in Februarie or March in the increase of the Moone.

Sow Larks-foote, Sparges, and Sperage, in Februarie in an old Moone.

Sow white Poppy, and Palma christi, in Februarie or March, in the increase of the Moone.

By all manner of Count the Moone increasing, she bringeth Cancer, Libra, or Aquarius.

So if you sow all kind of Seedes the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces: But those Seedes whose Rootes are round, should be sown three or foure dayes before or after the full Moone.

Certaine, and short Rules, for the comforting of the chiefe official members of the body of Man.

Things which are good to comfort the head.

**L**ignum Aloes, Marioram, Salingale, Mulske, Rosemarie, Roles, Camouell, Rew, Frankensence, Nutmegges, Hyssope, Balme, Mintes, Spike, and Claden.

Things

## White. 1614.

### Things good for the Eyes.

Fennell, Celendine, Agrimonie, Eyebright, Tervine, Roses, Quies, and cold Water.

### Things good for the Stomacke.

Anmegges, Digamun, Corall, Cloymewood, Quinces, Saffron, Dilbanum, Agrimony, Funetoxie, Cloues, Lignumaloes, Spilander, Mastike, and Spodgum.

### Things good for the Heart.

Saffron, Cloues, Cinamon, Corall, Lignumaloes, Macer, Myrrholanes, Pearles, Marioram, Muske, Buglossie, Natmeggis, Bourage, Rosemary, and Serwall.

### Things good for the Liver.

Liverwort, great Raisons, Cloymewood, Agrimonie, Saffron, Cloues, Endive, Saunders, Fennell, Rosewater, Clolets, Plantaine, Dragons, and Lettice.

### Things good for the Lungen.

Almondes, Dates, Raisons, Maydenhaire, Licopice, Elicompane, Lungwort, Distaces, and Penedies.

---

## Meates hurtfull for the Teeth.

**N**ottes, Meates very hotte, warme drinke, Sweete meates and drinke, Radish rootes, Hard meates, Bitter meates, Milke, much Hamming, Liches, Fatte of Fish, Coleworts, and Lemmons.

### Things hurtfull to the Eyes.

Sackliche, Unions, Radish. Drunkennesse, Letchery, Sweete and thicke wines, Salt meates, Coleworts, all Pulle, Must, Blinde, Dust, Smoake, Fire, and reading presently after supper.
